

Project Profile

Project name : United States Embassy Complex

Project location: Moscow, USSR

Client : United States Department of State
Foreign Buildings Office (FBO)

One of the first embassy projects completed by AIS for the original complex built in the early 1980's. AIS' effort included procurement of waterproofing and roofing, aluminum doors and windows, food service equipment and coping and ornamental metals.

Other embassy projects included:

Lahore, Pakistan – U.S. Consulate Building

Procurement of construction material for renovation of the consulate

Maputo, Mozambique – U.S. Consulate Building

Procurement of construction material for renovation of the consulate

Amman, Jordan – New Embassy Building

Procurement of the entire mechanical system

Cochin, India - U.S. Consulate Building

Procurement of construction material for renovation of the consulate

Doha, Qatar – New Embassy Building

Procurement of a variety of architectural material

Note: For all the project listed, with the exception of Moscow, AIS provide procurement services to the General Contractor. The work on the Moscow was a direct contract with the Foreign Buildings Office (FBO) Department of State.
